EDUCATION

Dr. D. Y. Patil Institute of Technology <i>B.E. in Computer Engineering CGPA: 9.70/10 (College Topper – 1st & 2nd Year)</i> Saraswati Vidyamandir College of Science <i>Higher Secondary (Class XII) 85.33% CET: 97.78 percentile JEE Mains: 94.86 percentile</i>	Pune, Maharashtra 2023 – 2027 Shahada, Maharashtra 2021 – 2023
--	---

ACHIEVEMENTS

- **Competitive Programming:** Solved **600+** DSA problems on LeetCode (contest rating **1816**, top **7.42%** globally, ranked **63,306/874,367**; **100 Days Badge 2026**, max streak 79 days) and **3★ on CodeChef**; topics include dynamic programming, graphs, trees, and binary search.
- **LOC 8.0 Hackathon:** Ranked **Top 10 out of 100+ teams** – demonstrated systems-level problem-solving and rapid prototyping under real-time constraints; built Kaaryantra, a production-grade AI job portal.
- **Academic Excellence:** College Topper for 1st and 2nd Year with CGPA **9.70/10**; scored **100/100 in Engineering Mathematics III**.
- **National Entrance:** JEE Mains **94.86 percentile** and CET **97.78 percentile** – strong quantitative and analytical foundations.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL, HTML, CSS
Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks
System Design: Distributed Systems, Microservices, Low-Level Design (LLD), High-Level Design (HLD), Scalability, Caching, Load Balancing
AI/ML: Supervised & Unsupervised Learning, Neural Networks, NLP, Prompt Engineering, LLM Integration
Python Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, TensorFlow
Frameworks & Technologies: React.js, Node.js, Express.js, Socket.io, Redis, Bull.js, REST APIs, JWT Authentication
Databases & Cloud: MySQL, MongoDB, AWS Cloud Fundamentals
Tools & Practices: Git, GitHub, Agile, Scrum, CI/CD

PROJECTS

- DevCollab – Collaborative Code Editor Workspace** | *React.js, Node.js, Express.js, MongoDB, Redis, Socket.io, Yjs* | [Live](#)
- Engineered a **production-grade real-time collaborative IDE** with **Yjs CRDT-based concurrent editing**, custom multi-user cursor flags, synchronized file tree syncing, and Monaco-diff history previews – supporting seamless multi-user collaboration at scale.
 - Designed a **horizontally scalable backend** using Socket.io Redis adapter for multi-instance deployment; implemented GitHub & Google OAuth with symmetrical account linking and rotated HTTP-Only JWT refresh cookies for zero-trust auth.
 - Integrated **Google Gemini AI** via Bull.js background queues for automated code audits on save; built **sandboxed Judge0 code execution** environments and auto-snapshot scheduler with 30-day MongoDB TTL indexes.
- Kaaryantra – Voice-First Multilingual AI Job Portal** | *React, Node.js, MongoDB, Gemini AI, Web Speech API* | [GitHub](#)
- Architected a **voice-first, AI-powered platform** bridging the digital divide for blue-collar workers in rural India, supporting **3 languages** (English, Hindi, Marathi) – reducing onboarding friction for non-literate users by eliminating form-based input.
 - Integrated **Google Gemini AI** and Web Speech API for **natural language job search and registration**, enabling zero-typing workflows; implemented automated worker-to-job matching engine via AI-ranked scoring.
 - Engineered **offline-first architecture** with graceful network fallbacks achieving **100% UI stability** during outages; built dual-dashboard (worker + employer) with real-time job tracking and smart notifications.

EXPERIENCE

- | | |
|--|--------------------------------------|
| Full Stack Developer Intern
<i>CodeAlpha</i> | Jan 2026 – Feb 2026
<i>Remote</i> |
|--|--------------------------------------|
- Built **2 production-ready full-stack applications** using the **MERN stack** with secure coding practices, modular architecture, and end-to-end feature ownership from design to deployment.
 - Designed and integrated **10+ RESTful API endpoints** with JWT-based authentication and **role-based access control (RBAC)**, ensuring secure multi-user data isolation.
 - Reduced **API response time by 20%** through targeted backend query optimization, efficient indexing strategies, and elimination of N+1 query patterns.
 - Shipped features iteratively in an **Agile/Scrum** environment with daily standups, sprint planning, and collaborative Git-based code reviews.
